Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/789,219	Applicant(s) AHMED ET AL.	
	Examiner Wayne Langel	Art Unit 1793	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1793

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 4-17 and 19-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Clawson et al '425 in view of Hwang et al, for the reasons of record. Applicants' argument, that Clawson et al '425 cannot be found to teach a fuel processor where both partial oxidation and steam reforming occur in the same zone, is not convincing, since applicants' claims do not require that partial oxidation and steam reforming occur in the same zone. Applicants' claims merely require that the inner or outer zone contain catalysts which would be capable of catalyzing both steam reforming and partial oxidation. Applicants' argument, that more than just the identity of the catalyst is at work in these systems, is not convincing. This argument supports the rejection, since applicants' claims do not exclude process conditions which would result in separate and distinct partial oxidation and reforming zones. Applicants' argument, that if Clawson et al '425 and Hwang et al were combined, then Hwang et al would render Clawson et al '425 unsuitable for its intended purpose, is not convincing, since Hwang et al is relied upon merely to show that platinum and palladium can function as either a steam reforming catalyst or a partial oxidation catalyst.
